

UNIVERSITY OF ALBERTA
FACULTY OF EXTENSION

Occupational Health and Safety Certificate Program

Concern for health and safety in the workplace is increasing among workers and employers across all industries and society in general. The *University of Alberta's Occupational Health & Safety Certificate Program* is a practice-oriented, research-based, multidisciplinary program based on an integration of engineering, physical, chemical, biological, social, and psychological knowledge. This program is designed to help practitioners from many different backgrounds develop the competencies needed to be effective in the development, implementation, and evaluation of health and safety programs and systems in a wide variety of occupational settings.

Why our program?

- Flexible schedule
- Open start date
- Courses taught by industry leaders
- Two-way dialogue between facilitator and learner allows sharing of ideas
- Preparation for registration as a Canadian Registered Safety Professional (CRSP)
- Students who have obtained their NCSO, MSO, QSR or CHSC designations are encouraged to apply for exemption credit and receive 21 hours (towards the 35 hours) of the Enrichment Seminar requirement of the OH&S Certificate Program.
